CAILLEAUX Christopher

Requires Php 5.4, Apache 2.4, Mysql 5.5 (only mysql compatible)

Access on git : `git clone https://christopher.cailleaux@code.google.com/p/ccx-ing5-si2-ql/`

How to install :

1. Set up a apache & php server on your machine and dezip the archive in the www folder.
2. The deziped folder named CloudNote should be at the root of apache's folder. If not the software will not work.
3. Modifie the file « CloudNote/application/config/database.php » for the host, username, password and database. The database name must be « cloudnote ». Apply the script « CloudNote/sql/cloudnote.sql » on the database. Note : mysql should be accessible on the ip 127.0.0.1 if not the software will not work.

How to use :
- Create account a http://localhost/CloudNote/index.php/signup/
- Sign in at 'http://localhost/CloudNote/index.php/signin/
- Create notes by clicking the New note button/
- Keywords such as Meeting , Meet, Lunch , Dinner appointment and date and time are recognized by the system. For example : « Meeting with Bob at 11 :00 AM on 24/12/2013 » and will add a reminder to it. Different format of date and time are recognized such as MM/DD, MM/DD/YYYY, MM:HHAM, MM:HH PM etc.
